<b>Office Action Summary</b>	<b>Application No.</b> 10/593,738	<b>Applicant(s)</b> ECKHARDT ET AL.	
	<b>Examiner</b> Jerry Redman	<b>Art Unit</b> 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 20 January 2010.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

The request filed on 6/16/2010 for a Request for Continuing Examination (RCE) under 37 CFR 1.114 is acceptable and an RCE has been established. Any previous finality is hereby withdrawn and a new action on the merits follows. Any newly-submitted claims have been added. An action on the RCE follows.

The status of the claims is as follows:

Claims 7, 13, 15, and 17-19 are withdrawn from consideration; and

Claims 1-6, 8-12, 14, 16, and 20 (newly added) are herein addressed below.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 12, 14, 16, and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent to Kirejczyk (7424788 B2). As shown in Figure 11, Kirejczyk (7424788 B2) discloses a window lift system (200) comprising a pulling device (222) attached to a module for a side window of a vehicle and specifically, vehicle door with the window lift system (200) further comprising a window pane (204) a single catch (242)

Art Unit: 3634

attached to a bottom edge of the window pane (204), a cable/chain attached to the pulling device (222) such that as the window is driven between open and closed positions the window pane (204) is controlled solely by the upward pulling and downward pulling of the pulling device (222). The position of the window pane (204) is positioned within the catch (242) has six degrees of freedom since the pulling device is only attached to the cables which are solely attached to the catch (242) attached to the bottom edge of the window.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirejczyk (7424788 B2) in view of Thomas (5,992,099). All of the elements of the instant invention are discussed in detail above except providing the catch with a lower stop and having walls forming a cone shape. Thomas ('099) discloses a catch (3) attached to the lower edge (100) of a window pane (1) and including a stop (301) and side walls (31 and 32) forming a cone. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Kirejczyk (7424788 B2) with a catch having a stop and sloped walls as taught by Thomas ('099) since the stop and sloped walls allows the bottom edge to be positioned within the catch and the stop allows the

catch to be fixedly attached thereto thereby allowing one to easily install/mount the window pane to the catch.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Several patents which disclose a window drive system have six degrees of freedom similar to that of the applicant's invention have been cited.

Applicant's arguments with respect to claims 1-6, 8-12, 14, 16, and 20 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-TH from 8 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Mitchell, can be reached on 571-272-7069. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
